

01 • SHIV AT A GLANCE

One brand. Multiple ways to build.

SHIV is a technology and design brand creating physical products, software and digital solutions. The brand is built around the idea that technology should be useful, beautifully designed and continuously improved.

WHAT WE BUILD Products • Software • Business solutions	HOW WE BUILD Design-led • Technical • Iterative
WHO WE SERVE Consumers • Students • Creators • Businesses	WHERE WE ARE GOING A broad modern technology + design brand

Brand idea

BUILD. DESIGN. EVOLVE.

This is the simplest mental model for SHIV. If a new product, service or project does not fit these three ideas, it should be questioned before it becomes part of the brand.

02 • VISION & MISSION

VISION

To build a future where technology, creativity and people come together to create meaningful solutions.

MISSION

Design, build and deliver innovative products, software and services that make life simpler, smarter and better. SHIV should be known for the quality of what it creates—not for making empty claims about innovation.

Long-term principle

Start small. Build real things. Learn from users. Improve relentlessly. Expand only when the foundation is strong.

03 • BRAND IDENTITY

CORE PERSONALITY

Innovative	Creative	Precise
Premium	Bold	Human
Modern	Experimental	Intelligent

Brand should feel

Minimal × Cinematic × Technological × Human. SHIV can be expressive, but never confusing. Visual confidence should come from craft, composition and product quality rather than clutter.

04 • LOGO SYSTEM

The SHIV wordmark must work across software, fashion, packaging, websites, app icons and physical products.

Primary wordmark Use for websites, packaging, social profiles and formal brand communication.	Compact symbol Use for app icons, favicons, labels, embroidery and small surfaces.
Monochrome White or black when reproduction, embroidery or print requires it.	Accent version Blue–violet gradient may be used selectively as the SHIV signature.

Do not use generic lightning bolts, crowns, shields, flames, circuit clichés or stock-logo symbols.

05 • COLOUR SYSTEM

Core palette

Obsidian #07090D	Charcoal #121722	Slate #2A3342	Mist #EEF1F5
White #FFFFFF	Electric Blue #4DA3FF	Violet #7C5CFF	Peach #FFB38A

Usage rule

Black, white and neutral tones provide the brand structure. Blue–violet is the primary technology signature. Warm peach/orange tones can appear in lifestyle and physical-product imagery. Accent colours should guide attention, not flood the interface.

06 • TYPOGRAPHY & UI LANGUAGE

Typography

Display: bold, clean sans-serif for major statements.

Body: highly readable sans-serif with generous line height.

Technical: restrained monospace for code, specifications and version labels.

UI principles

Clear hierarchy • generous whitespace • medium rounded corners • precise grids • strong contrast • few but meaningful controls • consistent iconography.

Golden rule

If an effect makes the interface harder to understand, remove it. Premium design is not maximum decoration; it is maximum clarity with excellent craft.

07 • VISUALS, MOTION & SOUND

Photography: cinematic, authentic, controlled lighting, strong composition and real product detail. Avoid generic stock imagery whenever possible.

Motion: smooth, deliberate and purposeful. Micro interactions ~100–250 ms; interface transitions ~300–600 ms; cinematic reveals can be longer when storytelling benefits from them.

Sound: SHIV can develop a recognizable sonic identity for launches, software and video content. It should be subtle, short and memorable.

08 • THE SHIV ECOSYSTEM

PRODUCTS

Physical products such as SHIV Wear, accessories, covers and decorations.

SOFTWARE

Digital products such as SHIV Launcher, SHIV JEE Practice and SHIV AI.

BUSINESS

Websites, custom software, automation and digital solutions for businesses.

Architecture

SHIV → Products / Software / Business

New offerings should remain under the master SHIV brand unless there is a strong strategic reason to create a separate brand.

09 • CURRENT PRODUCTS & SOFTWARE

SHIV Launcher

Customizable device launcher. V1 is being prepared for public launch.

SHIV JEE Practice

Customizable JEE practice platform with tests, PYQs, mistakes and analytics.

SHIV AI

AI-powered infrastructure and services being developed by SHIV.

SHIV Wear & Accessories

Customizable clothing, covers and decorations released through the physical-products line.

Business solutions

Business packages should focus on clear outcomes: professional web presence, custom digital tools, automation and tailored development.

10 • CONTENT & GROWTH ENGINE

SHIV should be built in public.

Development, design and product improvement are not hidden work. They are content assets. The tech channel demonstrates capability; SHIV converts that capability into products and services.

Build	Coding sessions, product development, UI/UX, experiments
Launch	Product reveals, demos, feature explanations, release videos
Proof	Completed projects, case studies, client results
Behind the scenes	Design, testing, packaging, manufacturing, iteration
Distribution	YouTube • Instagram • X • Facebook • WhatsApp Status

Content principle

1 real project → multiple pieces of content → audience → trust → product/service discovery.

11 • HOW WE WORK

Every employee should understand these principles before creating or publishing anything under SHIV.

0
1

Build real things.

Prefer useful products, experiments and measurable improvements over empty activity.

0
2

Design before decoration.

Every visual choice should improve understanding, usability or emotion.

0
3

Quality is visible.

Details in code, copy, UI, packaging and communication all affect the brand.

0
4

Move fast, then improve.

V1 does not need to be perfect, but it must be usable and worth improving.

0
5

Keep SHIV coherent.

New ideas can be different; they should still feel unmistakably SHIV.

0
6

Show the work.

Development and iteration can become content, proof and learning.

12 • QUICK REFERENCE

If you remember only this:

SHiV creates Products, Software and Business Solutions.

The brand feels **premium, modern, cinematic, technological and human.**

The visual foundation is **dark neutrals + clean light surfaces + controlled blue/violet/warm accents.**

The design language is **simple, clear, beautiful and purposeful.**

The operating philosophy is BUILD. DESIGN. EVOLVE.

SHiV — internal brand foundation, V1 • October 2026
